

CONSTRUCTION FENCES AND COVERS

1. Construction fences

USE

- perfect protection of mortars and facade materials from dryness, sun, rain and wind.
- protection of the scaffolding surroundings from pollution and objects falling from above.
- informative and advertising function, promoting the

constructor and the materials used.

- a positive evidence of the constructor, who secures the construction site properly.

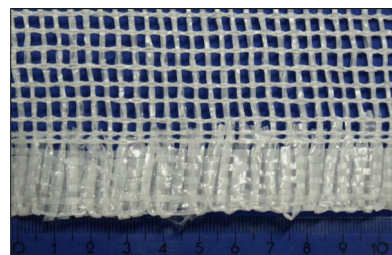

OFFER

We offer white, yellow, red and other construction fences upon request in the width of 2,6 m and 3,0 m. The standard size of the production unit is: full set with the area of 254,80 m², including 7 elements 2,6 x 14,0m each.

Additional specifications:

substance 100 g/m²

- side edges with interlaces at the end, top and bottom trimmed.
- packaging: foil + wrapping tape; package size: 105cm x 70cm x 43cm; package weight: 30 kg

Full scaffolding covers

USE

- possibility of working at low temperatures and use heaters
- protection of facade materials well from weather conditions.
- conducting renovation works with completely clean surroundings.
- the advertisement on covers is much more visible than on a fence

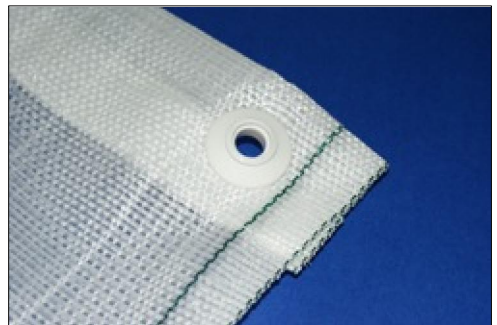

OFFER

We offer white covers in the width of 2,6 m and substance 165 g/m^2 . The standard size of the production unit is: full set with the area of $182,00 \text{ m}^2$, including 5 elements $2,6 \times 14,0 \text{ m}$ each.

Additional specifications:

- side edges with interlaces at the end, top and bottom trimmed.
- Eyes in the corners
- packaging: foil + wrapping tape; package weight: 30 kg
- 100 plastic, disposable cleat tapes included in every package upon request.

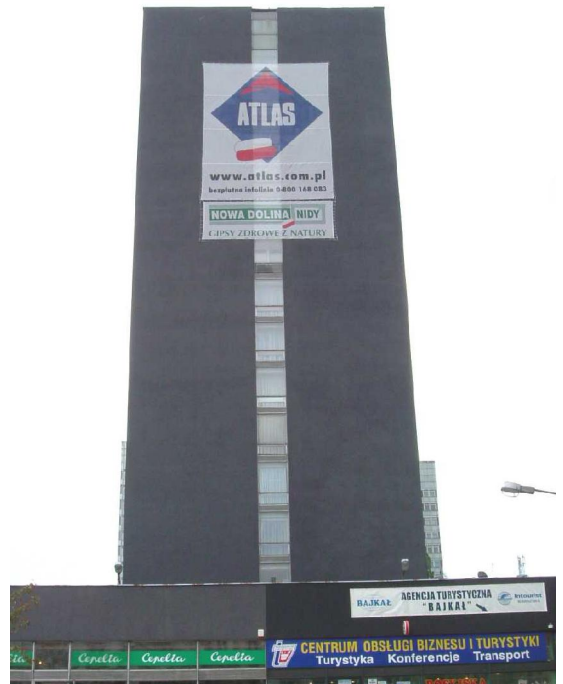

Large format advertisements

We also offer you your company's advertisement, made on the basis of construction fence, sewn together from elements to create one, gigantic advertising block. We also accept individual orders and the price of 1m² of such an advertisement is a few times lower than the price of 1m² using digital printing and mesh fence.
